Subject: Neighbourhood Plan

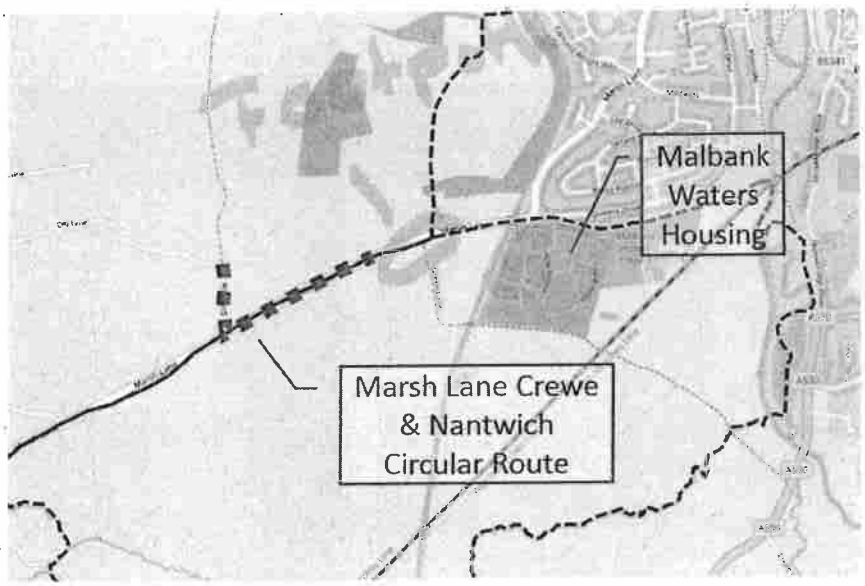

Dear Acton, Edleston Parish,

I'm a house owner and resiidden in the malbank waters development.
I had a look at the neighbourhood plan and I'm very pleased to see that you'll incorporate the new areas more.
I'm a keen walker and would like to see the situation of the footpaths inmproved. On your plan it looks like you are planning on building a footpath on Marsh Lane towards Dorfold Hall. This is a path which I personally believe is a great idea to create. However, I would like to suggest to connect the newly planned footpath with the already existing footpath which stops a few meters before Green Lane. I believe that this footpath would improve the walking situation immensly. Currently I see a lot of people walking on the main rode which is dangerous.
The proposed start position of the footpath joining with the the public rights of way is in my opinion not ideal as it can often not be used due to too much mud or too many cows.
. it is possible I would be very grateful if the footpath can join back all the way to the original footpath. This will give everyone the possiblity to enjoy a walk without going through muddy fields.

Please find below the exact location of the footpath I'm describing. The blue dotted line is the planned footpath lenght, the yellow marker shows where I think it would be beneficial to extend the footpath to.

Thank you very much for creating a neighbourhood plan, I'm keen to see the developments in the parish.

Kind regards
